

## **JAIN Workshops in Canberra... a brief description.**

**1-day workshop Canberra Saturday 19th June**

### **The Universal Formulæ – Rapid Mental Calculation**

(Galactic Mathematics)

Find out how to accomplish complex and rapid calculations... in your head.

Used by NASA but not released to the public... Galactic Mathematics is on the leading edge of re-discovered technology.

Jain teaches this ancient yet simple system of mental - one line arithmetic, used extensively by Hindus more than 2,500 years ago. However the knowledge goes even further back... Jain incorporates much older techniques and calls this subject 'Galactic Mathematics'.

Jain will give you an understanding of the 16 basic Sutras or 'Word Formulæ' which can solve all known mathematical problems. During this workshop you will learn how to multiply 3 digit numbers in your head... with no calculator, pen or paper. Additional training is available by request.

**1-day workshop Canberra Sunday 20<sup>th</sup> June**

### **Lost Secrets of the PHI Code**

With Jain you will explore ancient hidden mysteries... you will learn why the shape of the Pine Cones is optically similar to the Human Heart, why we are awe-struck when we view Sacred Architecture like the Parthenon of Greece and the Pyramids of Gizeh... and why we are attracted to the proportions of the famous Mona Lisa.

Essentially, the human body is in resonance with the Living Mathematics of Nature.

You will find out about secret codes concealed in the GAYATRI MANTRA, the most famous Eastern prayer for Enlightenment. Embrace part of the ascension process already morphologically and geometrically encoded into our bio-magnetic and bio-electrical fields.

Jain will help you discover Sacred Geometry; Math's as Art, Math's as Science and Math's as History. He will help you to explore Sacred Geometries that are invisibly constructed and nested within the Heart, connecting us to all Memory of all Universes.
